Supplementary Fig. 2

The figure shows a bar chart representing Yfr055W RNA levels across wild type, dot1, sas2, and set1 in the presence of raffinose and galactose. The y-axis represents Yfr055W RNA levels, ranging from 0 to 180. The x-axis lists the conditions: wild type, dot1, sas2, and set1. Each condition has bars indicating the mean RNA levels with error bars representing standard deviation.
